EDUCATION

Malla Reddy University

B.Tech in Computer Science (Artificial Intelligence & Machine Learning)

Expected 2027
Hyderabad, India

- **CGPA:** 8.29
- **Relevant Coursework:** Data Structures & Algorithms, Machine Learning, Deep Learning, Database Management Systems, Operating Systems, Cloud Computing.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL, HTML/CSS

Frontend: React.js, Next.js, Redux, Tailwind CSS, Vite, Three.js

Backend: Node.js, Express.js, Flask, FastAPI, Django, REST APIs

AI/ML & Gen AI: Large Language Models (LLMs), Generative AI, PyTorch, Transformers, NLP, Pinecone (Vector DB)

Databases: PostgreSQL, MongoDB, MySQL, Redis

Cloud & DevOps: AWS (EC2, S3), Docker, Kubernetes, Railway, Terraform, Git, CI/CD Pipelines

ENGINEERING PROJECTS

TechIQ Preparation Platform | *React, Flask, PostgreSQL, Gen AI, Railway*

[GitHub](#)

- Engineered a technical interview preparation platform deployed on Railway, supporting dynamic question generation and real-time user progress tracking.
- Built robust backend REST APIs using Flask and PostgreSQL to securely manage user profiles, test scores, and analytics data with high availability.
- Architected a scalable deployment pipeline utilizing Railway's infrastructure, ensuring continuous integration and zero-downtime updates for end users.

Colldge Task Manager | *React, Node.js, Express.js, MongoDB, Tailwind CSS*

[GitHub](#)

- Developed a full-stack task management platform optimized for college students, featuring real-time deadline tracking and intuitive dashboard interfaces.
- Implemented secure user authentication using JWT and optimized database queries in MongoDB, reducing data load times by 30%.
- Designed responsive and highly accessible frontend components using React and Tailwind CSS, increasing user retention through enhanced UX.

LLM Comparison System | *Python, Transformers, NLP, FastAPI, Flask, React*

[GitHub](#)

- Built a comprehensive evaluation platform to compare multiple Large Language Models (LLMs) based on accuracy, relevance, and semantic quality.
- Developed automated NLP evaluation metrics to benchmark model performance, driving a 30% improvement in model selection accuracy for end-users.
- Created a scalable backend using Flask and FastAPI to serve the comparison engine to 100+ concurrent users with sub-second response times.

- Developed an end-to-end AI product generating context-aware quotations using advanced Natural Language Generation (NLG) techniques.
- Built a scalable REST API with Flask and Node.js to serve generated quotes to a frontend client, handling over 500+ requests per minute.
- Optimized the ML inference pipeline and text preprocessing algorithms, resulting in a 25% increase in generation speed and reduced compute costs.

CERTIFICATIONS

Flask Development Certification – LinkedIn Learning	2024
Understanding Large Language Models – Microsoft	2023
Certificate of Accomplishment in SQL – HackerRank	2023
