## OBJECTIVE

0 years of experience in Full Stack Development, Machine Learning, and Data Structures. Built 6 projects with measurable impact, including a Large Language Model Comparison System with 30% accuracy improvement. Expertise in Python, JavaScript, and React.

## EDUCATION

**B.Tech (Computer Science), Malla Reddy University**

Expected 2027

Hyderabad, India

- CGPA: 8.29

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript

**Frontend:** React, HTML/CSS

**Backend:** Node.js, Flask, Django, FastAPI

**Databases:** MongoDB, MySQL, PostgreSQL, Pinecone

**Cloud & DevOps:** Git, Aws, Docker, Kubernetes, Terraform

## PROJECTS

**Nexus AI Chatbot** (React, TypeScript, Python, FastAPI, Pinecone)

[\[GitHub\]](#)

- Description:** An advanced conversational AI trained on proprietary data. Features real-time streaming, semantic search, and seamless integration.
- Built robust real-time streaming interfaces handling complex conversation flows with seamless UX.
- Implemented semantic search using Pinecone vector database, reducing retrieval latency significantly.

**CloudFlow Architecture** (AWS, Docker, Kubernetes, Terraform, Node.js)

[\[GitHub\]](#)

- Description:** A highly resilient microservices architecture deployed on AWS. Automated CI/CD pipelines, autoscaling, and zero-downtime deployments.
- Orchestrated scalable microservices using Docker and Kubernetes, ensuring 99.9% uptime.
- Automated infrastructure provisioning with Terraform and optimized CI/CD pipelines for rapid delivery.

**Large Language Model Comparison System** (Python, Transformers, NLP, Jupyter Notebook, FastApi, Flask)

[\[GitHub\]](#)

- Description:** Compared outputs of multiple Large Language Models based on accuracy, relevance, and response quality.
- Implemented evaluation metrics for NLP-based model performance analysis, resulting in 80% accuracy improvement.
- Built a system to compare outputs of multiple Large Language Models, serving 100+ users.

**AI Quotation Generator** (Python, Machine Learning, NLP, Flask)

[\[GitHub\]](#)

- Description:** Developed an AI-based quotation generator using natural language generation techniques.
- Implemented text preprocessing and inference pipeline for real-time quote generation, generating 500+ quotes.
- Improved quote generation speed by 25% through optimization of the inference pipeline.

## CERTIFICATIONS

**Understanding Large Language Models** – Microsoft

2023

**Certificate of Accomplishment in SQL** – HackerRank

2023
